Dennis Cho

Full-Stack Web Developer (Open to Remote opportunity)

I have already completed **more than 30 website and mobile app projects** related to various frontend & backend modern technologies, system architecture, database optimization **for 6 years**.
With mastering excellent online courses and tutorials about JavaScript Frameworks and Serverless Architecture and excellent real experiences, I have learned and kept following points.

- Code standards
- Unit tests are a key step for improving code quality
- Effective system architecture to save development time and reduce cost
- Tools like Git/Bitbucket, Trello, Jira

My main skills are JavaScript(React, Angular), PHP(Laravel), Python(Django).

Backend: PHP(Laravel, CodeIgniter), Node, Express, GraphQL, Python(Django, Flask), Ruby On Rails

Frontend: React/Redux, Redux-saga, Vue.js, SCSS/SASS/LESS

Database: MySQL, MongoDB, DynamoDB, PostgreSQL

Serverless Experience: AWS Lambda, Azure Functions, Google Cloud Functions

Software Engineering: Agile Development with Trello, JIRA, Git Flow

Blockchain: Blockchain/Cryptocurrency/IPFS

eCommerce : Magento

I believe my passion, talent, positive, can-do attitude. Hope to contribute the future.
